

**Development is so much simpler when
you have a partner.**

“Canberra Industries has worked with Advanced Decisions *since 1999*, using ADI’s employees as senior designers, architects and system implementers. We have found ADI’s people to be knowledgeable, hard-working, and reliable. It has been a pleasure to deal with Advanced Decisions.”

- Bob Huckins, Software Manager
Canberra Industries, 2005

People. Process. Technology. **Develop wisely.™**

Software & Hardware Services

WHO WE ARE

As one of the first software and hardware consulting firms in the Northeastern United States (founded in 1970), Advanced Decisions has more than 35 years of experience in software and systems development. We build long-term support relationships with our clients - some lasting a decade or more. Our clients know they can turn to us any time - when they just need technical advice, or when they need contractors, outsourcing services and process consulting. Our mission is to help our clients **develop wisely.™**

OUR EXPERTISE

We have hands-on experience across vertical markets, diverse technologies and a variety of software processes, methodologies and tools.

WHAT'S IN A NAME

What makes a decision **advanced** is when a person takes the time to understand a situation clearly, think through the relevant factors and consequences, identify different options, evaluate the method for decision-making, and then move forward confidently. This ability to step back and see the broader implications of a decision, consider factors that might not occur to others, weigh creative options, and still act decisively is the hallmark of a truly great developer, architect or project manager. In knowledge work like management, system design and programming, where the value is in the thinking, this ability to make advanced decisions separates the average to good workers from the top performers.

“Over the years, we had the need many times for additional resources to complete a portion of a project or an entire project. Advanced Decisions was always there to provide us with high level, knowledgeable engineers in many different capacities. The software provided by ADI was always completed in a timely manner, and follow up support fast and efficient. Personnel are professional, specifications are succinct; overall, a great company to work with.”

- Barbara Spain, Director
Program Management,
CRS Division - Dictaphone
Corporation, 2005
